### **Witness The North American Debut Of The All-New Eclipse Cross Live /**

We can't think of a better way to cap off our Century of Innovation than to invite you to see one of our most exciting vehicles, at one of the best auto shows of the year! The dynamic, distinctive, brilliantly designed, all-new 2018 Mitsubishi Eclipse Cross CUV will make its North American debut at this year's [Los Angeles Auto Show](#), which will be open to the public at the LA Convention Center beginning Friday, 12/1. But, if you can't make it in person, no worries — we'll livestream the event on our Facebook page and our website so you don't miss a minute. Click below to sign up for more information about the revolutionary Eclipse Cross and the livestreaming event.

### **SEE TO BELIEVE**

### **World's First Plug-In Hybrid Crossover /**

Yes, you read that right! Soon, you'll be able to enjoy the all-new 2018 Outlander PHEV, featuring Plug-In Hybrid Electric Vehicle (PHEV) technology that previously only existed in the luxury vehicle market. Translation: We've created the only vehicle in its class with the practicality of a CUV and availability of Super All-Wheel Control, as well as the only PHEV with DC Fast Charging capability (which charges the vehicle up to 80 percent capacity in as little as 25 minutes). Two AC power outlets are available in the Outlander PHEV and they are located in the rear seat cargo area. The plugs draw directly from the drive battery and provide 1,500 watts of electric power, enough to power nearly any portable household appliance — it's the ultimate outdoor vehicle. Click below to learn more about our new PHEV of the future, and get on the list for yours when it arrives in dealerships!

## Tradition And Innovation Become One /

If you missed the West Coast Customs episode of the Mitsubishi Re-Model A creation — the ultimate hybrid of Mitsubishi's history and innovation — you're in luck! It's not too late to head to our [website](#) for behind-the-scenes footage, photo gallery and more of how it all came together. From conceptualization to its first drive, check out how the West Coast Customs team infused [plug-in hybrid electric vehicle \(PHEV\)](#) and other modern-day technology in the traditional Model-A body design, for a vehicle that truly commemorates our 100-year history.
