VEHICLE MAINTENANCE

Selecting the proper maintenance schedule

There are two maintenance schedules that show proper service for your vehicle.

First is “Regular maintenance schedule”.
Follow the Regular maintenance schedule only if none of the driving conditions in the Severe maintenance section apply.

Second is “Severe maintenance schedule”.
Follow the severe maintenance schedule only if your vehicle is frequently driven under one or more of the following road conditions.

- Driving on dusty, rough, muddy or salt-spread roads
- Towing or police, taxi or commercial operation
- Extensive idling and /or low speed operation
- Repeated short-trip operation at freezing temperatures (engine not thoroughly warmed up)
- Extended use of brakes while driving
- Driving in sandy areas
- More than 50% operation in heavy city traffic during hot weather above 90°F (32°C)

---

Service station checks

The following items should be inspected by either you or a service station attendant each time fuel is added:

- Engine oil level. Add if needed. Check Owner’s Manual-See index and look under Engine Oil for detailed information.
- Engine coolant level. Add coolant to reservoir tank along with the proper mix if needed. Replace coolant if dirty or rusty in color. Check Owner’s Manual-See index and look under Coolant for detailed information.
- Windshield washer fluid level. Add fluid to washer tank if necessary.
- Tire inspection. Inspect for unusual tire wear and proper inflation. Check Owner’s Manual-See index and look under Tire for detailed information.
