Service precautions

Vehicle maintenance is an important yet frequently neglected item. Proper maintenance will aid in retaining the level of performance that has been engineered into your Mitsubishi vehicle and will guard against major repair expenses resulting from neglect. Good maintenance is a great way to protect your investment and ensure proper performance.

Your Mitsubishi Motors Dealership is in the best position to provide proper maintenance service through Mitsubishi's exclusive "Diamond Care Service".

- Factory Trained Technicians
- Advanced Diagnostic Equipment
- Quality Workmanship
- Mitsubishi Genuine Parts
- Mitsubishi Authorized Accessories
- Competitive Prices
- Fast Service
- Commitment to Customer Satisfaction

2004 MODEL YEAR TURBO CHARGED

VEHICLE MAINTENANCE

Selecting the proper maintenance schedule

There are two maintenance schedules that show proper service for your vehicle.

Regardless of which maintenance schedule you follow, the use of fully synthetic motor oil is required. See "Engine Oil and Filter" in the Owner's manual for details on motor oil requirements.

First is "Regular maintenance schedule".

Follow the Regular maintenance schedule only if none of the driving conditions in the Severe maintenance section apply.

Second is "Severe maintenance schedule".

Follow the severe maintenance schedule only if your vehicle is frequently driven under one or more of the following road conditions.

- Driving on dusty, rough, muddy or salt-spread roads
- Towing or pulling a trailer or commercial operation
- Extensive idling and/or low-speed operation
- Repeated short-trip operation at freezing temperatures (engine not thoroughly warmed up)
- Extended use of brakes while driving
- Driving in sandy areas
- More than 50% operation in heavy city traffic during hot weather above 90°F (32°C)
Emission control system maintenance

The "factory" maintenance services, listed in bold type must be done at the times or mileages specified to assure the continued proper functioning of the emission control system. These, and all other maintenance services included in this manual, should be done to provide best vehicle performance and reliability. More frequent maintenance may be needed for vehicles in severe operating conditions such as dusty areas and very short trip driving. Inspection and service also should be done any time mal-function is suspected.

Service station checks

The following items should be inspected by either you or a service station attendant each time fuel is added:

- Engine oil level. Add if needed. Check Owner's Manual See index and look under Engine Oil for detailed information.
- Engine coolant level. Add coolant to reservoir tank always the proper color. Replace coolant if dirty or rust in color. Check Owner's Manual See index and look under Coolant for detailed information.
- Windshield washer fluid level. Add fluid to washer tank if necessary.
- Tire inspection. Inspect for unusual tire wear and proper inflation. Check Owner's Manual See index and look under Tire for detailed information.
Regular Maintenance Schedule

Enter Your Original In-Service Date Here:

Month  Day  Year

Original In-Service Date

Regular maintenance schedule

Mileage or Time-Whichever occurs first

● 5,000 Miles (8,000km) or at 5 months
  ☐ Change engine oil.
  ☐ Replace engine oil filter.
  ☐ Inspect disc brake pads and rotors for wear.
  ☐ Inspect suspension system for looseness and damage.
  ☐ Inspect drive shaft boots for grease leaks and damage.
  ☐ Rotate tires.
  ☐ Replace air purifier filter.

● 10,000 Miles (16,000km) or at 10 months
  ☐ Change engine oil.
  ☐ Replace engine oil filter.
  ☐ Inspect disc brake pads and rotors for wear.
  ☐ Inspect suspension system for looseness and damage.
  ☐ Inspect drive shaft boots for grease leaks and damage.
  ☐ Rotate tires.
  ☐ Replace air purifier filter.

### Regular Maintenance Schedule

**Mileage or Time-Whichever occurs first**

#### 60,000 Miles (96,000km) or at 60 months
- Check fuel system for leaks (tank, pipe line and connection, and fuel tank filler tube cap).
- Check fuel hoses condition.
- Replace air cleaner filter.
- Check evaporative emission control system for leaks and clogging (except evaporative emission canister).
- Replace spark plugs, iridium-tipped type.
- Replace ignition cables.
- Replace timing belt *1*

*1 For California, Massachusetts, Vermont and Maine, this maintenance is recommended but is not required to maintain the emissions warranty.

#### 55,000 Miles (88,000km) or at 55 months
- Change engine oil.
- Replace engine oil filter.
- Inspect disc brake pads and rotors for wear.
- Inspect suspension system for looseness and damage.
- Inspect drive shaft boots for grease leaks and damage.
- Rotate tires.

    - Replace spark plugs, iridium-tipped type.
    - Replace ignition cables.
    - Replace timing belt.

    | MILEAGE/MONTH | DEALERSHIP NAME/ CODE | DATE | REPAIR ORDER # |
    |---------------|-----------------------|------|----------------|

- Replace drive belts (for the generator, water pump, power steering pump).
- Check and service exhaust system (connection portion or muffler, muffler pipes and converter heat shield).
- Change engine oil.
- Replace engine oil filter.
- Grange manual transaxle oil.
- Change transfer oil.
- Change engine coolant.
- Replace coolant hoses.
- Check disc brake pads and rotors for wear.
- Check brake hoses for deterioration or leaks.
- Inspect ball joint and steering linkage seals for grease leaks and damage.
- Inspect suspension system for looseness and damage.
- Inspect drive shaft boots for grease leaks and damage.
- Change rear axle oil, with Limited Slip Diff.
- Rotate tires.
- Replace air purifier filter.
Severe maintenance schedule

- **63,750 Miles (102,000km) or at 68 months**
  - Change engine oil.
  - Replace engine oil filter.
  - Inspect disc brake pads and rotors for wear.
  - Inspect suspension system for looseness and damage.
  - Inspect drive shaft boots for grease leaks and damage.
  - Rotate tires.
  - Inspect air purifier filter for clogging.
