Emission control system maintenance

The "scheduled" maintenance services, must be done at the times or mileages specified to assure the continued proper functioning of the emission control system. These, and all other maintenance services included in this manual, should be done to provide the best vehicle performance and reliability.

Inspection and service also should be done any time a malfunction is suspected.

To ensure proper emission control performance, you should continue scheduled maintenance beyond the 10 year period shown, by following the same schedule pattern as for the first 10 years.

Service station checks

The following items should be inspected by either you or a service station attendant each time fuel is added:

- Engine oil level. Add if needed. Check Owner's Manual index and look under "Engine Oil" for detailed information.
- Engine coolant level. Add coolant that is properly mixed to reservoir tank if needed. Replace coolant if dirty or rusty in color. Check Owner's Manual index and look under "Coolant" for detailed information.
- Windshield washer fluid level. Add fluid to washer tank if necessary.
- Tire inspection. Inspect for unusual tire wear and proper inflation. Check Owner's Manual index and look under "Tire" for detailed information.

Selecting the proper maintenance schedule

There are two maintenance schedules that show proper service for your vehicle.

Schedule 1

Use Schedule 1 if you primarily operate your vehicle under any of these conditions;

- Driving on dusty, rough, muddy or salt-spread roads
- Towing or police, taxi or commercial operation
- Extensive idling and /or low speed operation
- Repeated short-trip operation at freezing temperatures (engine not thoroughly warmed up)
- Extended use of brakes while driving
- Driving in sandy areas
- More than 50% operation in heavy city traffic during hot weather above 90°F (32°C)

Schedule 2

Use Schedule 2 only if you primarily operate your vehicle under conditions other than those listed in Schedule 1.
